Objective

As a Web Developer, I specialize in creating impressive, secure, responsive, and dynamic websites using HTML, CSS, JavaScript, React.js, and the MERN stack. Eager to learn and grow, I am actively seeking a **Website Development role** where I can leverage and apply my full range of technical skills to create impactful digital experiences.

Education

ST. ANDREWS INSTITUTE OF TECHNOLOGY AND MANAGEMENT
- MDU | Aggregate: - 80.1% | Bachelor of Computer Application |

SARVODAYA BOYS SSS NO 1 SUBHASH NAGAR NEW DELHI
- CBSE | Aggregate: - 60.3% | Class - *XII* |

SARVODAYA BOYS SSS NO 1 SUBHASH NAGAR NEW DELHI
- CBSE | Aggregate: - 73.5% | Class - *X* |

Achievements

➢ I achieved the 2nd position in my BCA Final Year with a remarkable score of over 80.1%. It was an honor to receive recognition and awards from the College Dean.

➢ Successfully completed frontend development and participated in a coding marathon at QSpiders. Now proficient in CRUD operations using the MERN stack.

Internship Experience

Suvidha Foundation, Website Development Intern
- Duration: 2 months
- Responsibilities:
  - Developed website using HTML, CSS, JavaScript, and React.
  - Created card sections and footer for the website.
- Achievements:
  - Developed responsive web pages using HTML, CSS, and JavaScript.
  - Implemented modern design techniques like Flexbox and animations.
  - Utilized React.js to create dynamic components and enhance website functionality.

Interests

- Proficient in website development and design
- Basic understanding of the stock market

Skills And Tools

Skills: -

- **Frontend Technology**
  - **HTML & CSS**
    - CSS Selectors, Flexbox, Animations, Transitions, Transforms, Media Query
  - **React Bootstrap**
  - **Material UI**
  - **JQuery**
  - **JavaScript**
    - Array, String, Object, AJAX, JSON, DOM API.
  - **React js**
    - Functional Components and Class Components.
    - JSX, Hooks, React Router DOM, Redux, Axios
- **Java**
  - Java Basics, Flow controls, loops, methods, OOPs, Array, String
- **API Handle**
  - Get, Post, Put, Patch
  - Data Picking and looping
  - State Management
- **Backend Technology**
  - **Node js**
    - Connection String with MongoDB Database and SQL Oracle Database
    - CRUD Operations
    - JWT
- **Communication Skill**

Tools:- VS Code, ChatGPT, CRA (Create React App), NPM, MongoDB Compass and Oracle 10g

Projects

1. **Ecommerce Website**

   It is a full-stack E-commerce platform leveraging the power of MERN stack. Users can seamlessly register, log in, browse products, and manage their profile, all with enhanced security through JWT authentication.

   Using:- MERN stack, JWT, React Bootstrap

2. **GitHub User Search with Responsive**

   Developed "GitHub User Search Web App" utilizing AJAX for API calls. Features include user profile display, repository listing, and user info. Implemented profile links for seamless redirection.

   Using:- HTML, CSS, JavaScript, API

   Project Link:- **https://github-user-search-api-2023.netlify.app/**

   LinkedIn Link:- **https://www.linkedin.com/in/imraviranjansharma/recent-activity/all/**

3. **News 24*7**

   Developed a dynamic dashboard enabling users to explore global news trends using filters like topic, area, country, and SWOT analysis. Implemented intuitive UX/UI design for seamless data visualization and efficient search functionality. Demonstrated proficiency in full-stack development and data visualization techniques.

   Using:- HTML, CSS, JavaScript, React.js, Node.js, express.js, MongoDB, REST API
